

BPS® Connect Casino

The application for perfectly integrated count room process management

Giesecke & Devrient

Creating Confidence.

Unparalleled flexibility and efficiency in count room management

Giesecke & Devrient (G&D), a global leader in providing system solutions for banknote processing, offers cutting-edge technologies for secure, accurate, and efficient

banknote processing, sorting, and verification. BPS Connect Casino software solution combined with our BPS line of equipment will

maximize performance by integrating industry-proven best practices. BPS Connect Casino has the flexibility to accommodate different modes of processing as per local

regulatory requirements, as well as built-in interfaces to all casino management system hardware and software.

Objective: Process support and flexibility

Benefits of BPS Connect Casino

Optimal process support

- Counting, sorting, and balancing: The system will accurately account for all currency, and simultaneously sort according to your specifications
- Interface with smart can systems: Provides for quick and accurate accounting by asset
- Header card technology: This proven platform provides true continuous processing of all assets

Multisystem reporting

- Dashboard functionality: Immediate visualization of performance indicators
- Customer-specific reporting: Flexible, extensible reports
- Central, consolidated reporting: All reports on system availability, performance, etc. are grouped together on a server and consolidated into one multisystem report

Microsoft standard infrastructure: A technology advantage

- Supports Windows®, the Windows® Server, and the MSSQL Server database for exceptional desktop performance
- Minimal hardware investment since no large extra servers are needed

BPS Connect Casino – The cornerstone of count room integration

With BPS Connect Casino, you have unmatched flexibility with:

Connectivity

- SQL Server based system
- Full integration to all systems
- Multiple count rooms
- Multiple casinos
- Smart can system interfaces
- Mobile device capabilities

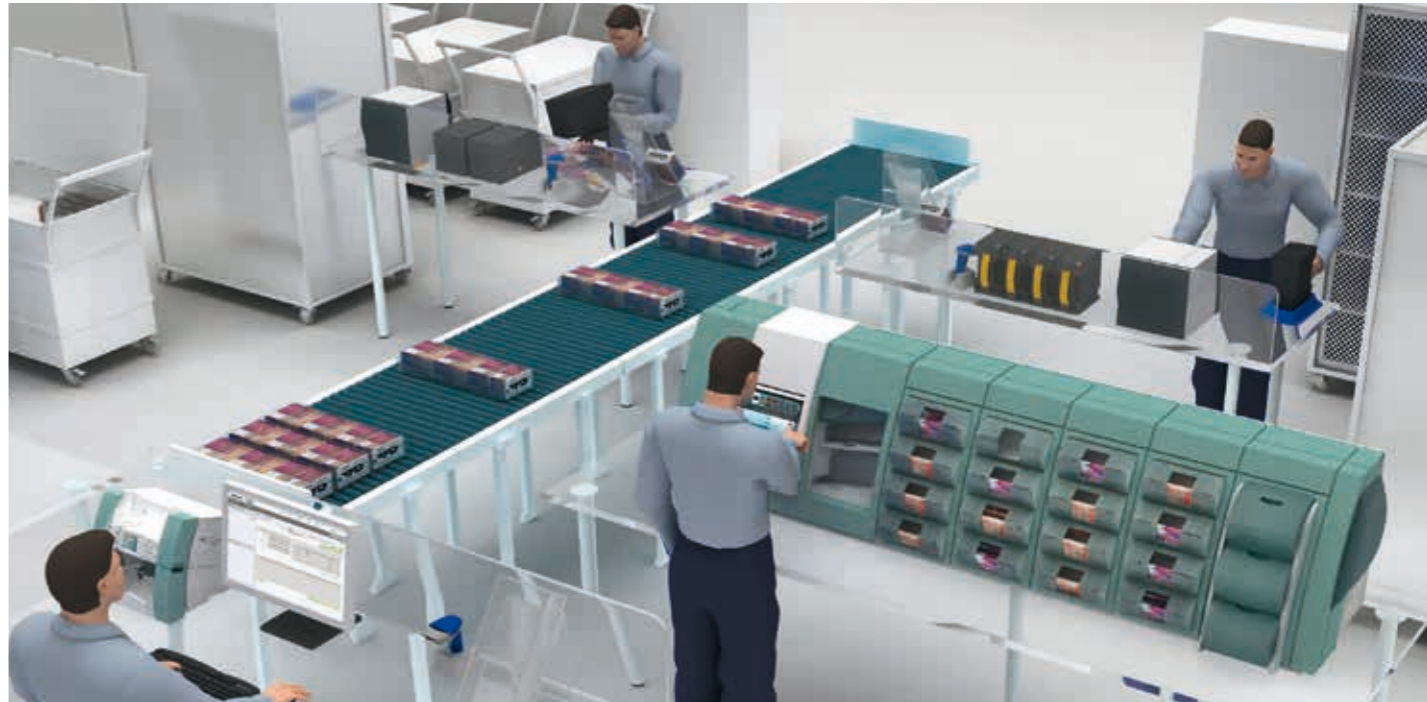

Processing

- Preparation
- Header card creation
- Asset tracking throughout process
- Slots, tables, F&B, kiosk/ATM processing
- Reconciliation
- Multicurrency capabilities

Back office

- Full integration into casino accounting systems
- Dashboard of complete process performance
- Reporting and analysis
- Consolidation of multiple count rooms and/or casino locations

Only BPS Connect Casino can seamlessly capture all system data to harness the full power of your banknote processing systems.

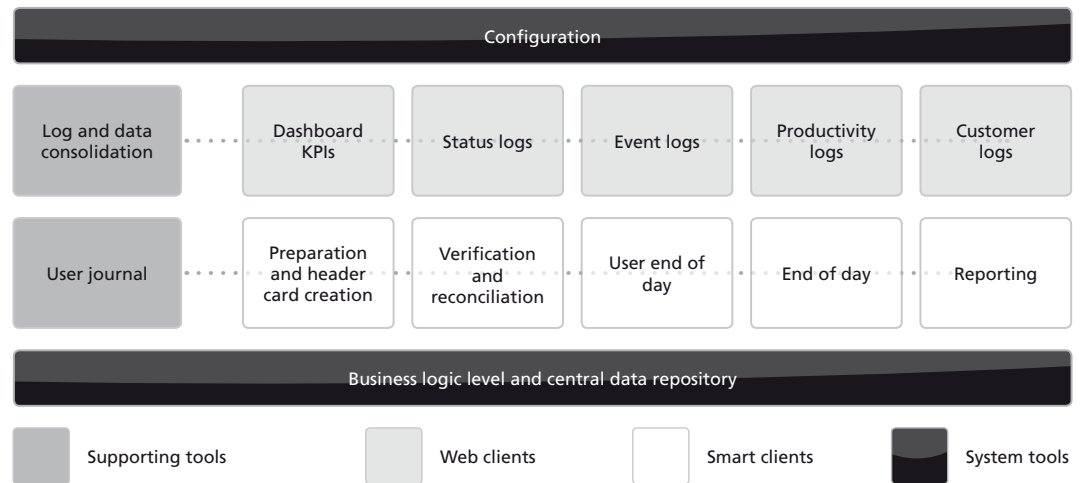

Modular design for custom solutions

One of the strengths of BPS Connect Casino is its highly modular design, which makes it extremely customizable for each casino's needs.

New functions and requirements can be readily integrated without affecting the quality or stability of existing modules. This ensures maximum scalability.

Your benefits at a glance:

- Flexible adjustment of software architecture
- System operation can be optimized to accommodate local gaming requirements
- Guaranteed quality and performance
