We make cash flow.

Your new customer magnet -
a sales increase system

Secure promotional
conditions now!

Where should you go with all your coins?

Nearly every one of your customers has a stash of coins - either in an overloaded wallet or in a glass jar at home. Getting rid of it again is not that easy.

We offer the perfect solution - a win-win situation!

The CoinShopper by Procoin transforms non-productive coins into additional purchasing power and increased sales.

A benefit for your customers:

Get rid of small change and shop immediately!

CoinShopper is a self-service coin deposit system that's easy as pie to use. After the machine has counted the coins, it prints out a value voucher that is redeemable in your store.

The advantage for you:

Increased sales and greater customer loyalty!

- The value voucher is perceived as "extra money" by your customers and is issued directly in your store for purchases.
- The collected coins are used as change in your cash registers. Alternatively, your service provider will make sure that the coins are removed from the machine.

CoinShopper - the new cash cow for your store

- The CoinShopper attracts more customers into your store.
- Significant increase in sales through additional voucher purchases
- Reliable small change processing that is readily available

Vouchers generate
additional turnover
